About This Game

Snow Ash Land is a **multiplayer** post-apocalyptic top-down shooter game with rpg mechanics and survival in semi-open world. It simulates a dying society in a post-apocalyptic world. Guided by factions with very different ideologies, the player can choose to help rebuild civilization or destroy humanity.

There's a lot of interactions between players in multiplayer mode : **Guilds, pvp territory wars**, resources and informations exchanges, language, politics, economy, building...

Each player can be a piece of a huge whole, choose a profession with its importance in the workings of the political and economic system of the game, whose effectiveness and utility will depend on the professions of the other players.

You will need each other to do your job effectively and succeed in creating some semblance of economic and social stability or you can be part of those who want the end of old societies.

The game will have a strong dominant roleplay ,but without frustrating players who would simply like to fight and play competitively ,they will be able to choose a faction in which they can compete against each other without suffering any malus or bonus.

As for players who wanted to play more in the atmosphere of the game,they can choose a simple citizen job so they will be protected by bonuses that will make others think twice before shoot them.

The player will have to explore the world to understand the past, how the world became what it is today. Some characters are the keys to history, they will give the player a lot of information to understand. With these elements it will then be possible to make choices, to decide which faction defends the path that you think is best.....

good game<3. This is a free game from Miniclip. Made on Flash, poorly optimized, almost unplayable. Doesn't deserve a proper review.

Don't support devs like this one, ignore this game at all costs.. You will not like this game if:

If you understand nothing about basic market mechanisms and you have no intention to get into it.

If you don't like detailed and complex gameplay.

If you like winning after 20 minutes.

If you hate 2D games or oldies and you prefer AAA mind blowing games.

If you do not have time to think or plan ahead and instead you prefer straight forward gameplay.

If you are not afraid to play an old game that does not offer entertaining sea battles.

Patrician 3 is an interesting game that is surprisingly well balanced. In that sense it is not too hard to understand how the game works but if you want to explore all the aspects of the game then yes you will find challenges.

E.g - not running your business to bankruptcy isn't hard. You buy for 1 you must sell for 2. However attaining the rank of Patrician and becoming a local politician requires you to maximise profit, minimise cost, optimise trade routes, or utilise "auto-trade" tool etc. Indeed You need to reach a certain level of wealth in order to explore the entire gameplay.

Review 8/10. * Horrible machine-translated text that isn't even intelligible half the time.

* Horrible VN engine with a limited number of save slots that don't always work and a skip function that also doesn't always work.

* Two achievements that are obtainable only by buying a 10\u20ac DLC.

Skip this, not worth your time.

P.S. Pluto is not a planet.. This is a point and click adventure game. If you liked games like Monkey Island, sure you will reasonably enjoy it. Replay value is very limited unless you missed some of the achievements. The voice acting was good, the puzzles were simple. Its a game you play when you have played all the greats already. Honestly I bought this game on sale, Its filler something you play between waiting for the return of the golden age of classic point of clicks. Which sadly is never going to come back again. I enjoyed it. It made me miss my old adventure games. If you can get it on sale I'd reccomend it.. I wish more VR games were like this!

The art direction and graphics on this game are fantastic! I love zipping around space. Going to warp is very satisfying. The potential for this game is very high.

The only negative is that its very short. I beat it in around 45 minutes.

Feedback\Suggestions:

MOVEMENT:

Took me awhile to figure the best movement strategy.

Hold down the movement button on your dominant hand. This will make your other hand the movement hand. At first I found this super weird, but it actually works rather well.

So for me its hold down fire with my right hand, along with the movement button. Also hold down the fire button on the left hand, but use the left hand to move left or right. This means you are not always hitting your enemies with both guns, but you can circle around them and dodge their attacks, which is super fun.

BUGS:

The octopus bosses voice was coming from behind me instead of from the boss. (sound issue).

SUGGESTION: WARP

Going to warp is satisfying. I noticed the rocks that are flying by me at super speed are barely visible. You may want to slow them down, or make the rocks bigger, so they are more visible.

I wish I could shoot while in warp. I love the super speed!

I think there should be a mini warp for combat that speeds you up for a 2nd or two. This would be fun.

SUGGESTION: DRAGONS

The dragons look amazing. I think they need powerups. Either permanent ones or temporary, either works.

I also think the dragons should have different abilities. One is going to be the main firing gun, while the other is used for movement/dodging. I think the dragon being used for movement needs a different attack, maybe a heat seeking missile or a shotgun blast. This would work well with the way movement works in the game.

I think it would be AMAZING if the dragons had personalities. They could comment on how bad or well you are doing. If you kill a boss or kill many enemies quickly without taking damage, they could high five each other. This would be great.

SUGGESTION: DIFFICULTY

I hope there are more levels coming. At times it was too easy. I think increasing the speed of movement along with the speed of the player's bullets would be good on harder difficulties, along with more enemies.

SUGGESTION: Grip buttons

I am a VIVE player so the quick side looking did nothing for me. I think it would be better if these buttons made your character side step rapidly, or made you fly to the left or right, so you can orbit planets and enemies easier.

SUGGESTION: MINI WARP

I don't see a reason to ever stand still in this game, so you may want to have movement on all the time. This would free up the current movement button for a mini warp rush in combat, which would be very satisfying, and keep holding both movement buttons to charge up to a full warp.

I really like this game. Well done!

If you like spending money on things that will never be finished, then this is the game for you. This game triggered me.

It was also so awful that my pet goldfish hung itself after playing it.

Good work, peta.. Penny you rock!. Pretty damn good software, feels like's natively designed for 3D modelling so it will really feel lighting fast and comfortable to work with it compared to other 3d softwares, also the learning curve it's probably one of the smoothest and painless i've ever experienced.

Highly recommended for anyone who's really likes or is in depth in 3D modelling and UV mapping !. A very good game about my friend Frog Detective. This is really fun, if you can get a friend you'll have a blast playing against each other and not care that the servers are pretty empty, it's better with friends anyway right.. It's a really fun game. Here is a match that I've played with two friends [Swedish].

<https://www.youtube.com/watch?v=2fq2-VQj8yw>. When right in the first zone after the tutorial, in the 2nd battle my lvl3 beasts drop like flies to a lvl1 mob, because it pops attacks faster than I can possibly react, I'm fairly sure the design department failed really hard.. This is really an awesome game that is quite fun however it has one major problem it is a multi-player game that is rarely played anymore. You can play the game single player with AI bots (which are quite challenging if set to be so) or on LAN if you have separate keys handy.

compatibility

plays on windows 7 & 10 just fine. I have not tested it on win8 systems

bugs

None. The game is not only polished, but has no bugs.

fun/replay value

Good.

Multi-Player

Yes.

conclusion

One of the hardest things about the game is finding other players to play with. Other than that it is a solid game (be sure and go through the tutorial - Did I mention it has a tutorial ?). The long awaited Frozen Factory expansion adds everything you need to finish tier 4 equipment and adds an entirely new aspect of gameplay. While Tower Defense elements existed already the new enemy is a different beast.

An aspect many people will be questioning is, "Is this expansion really worth more than the base game?"

In my opinion, yes. The large amount of content the expansion adds is fantastic. This is coupled with the fact that I really believe that the base game is priced too cheap for what it brings. As I'm writing this review I've played the base game for over 200 hours on a \$12 game. Very few, if any, games have brought me this many hours of enjoyment for so little money.
