For what it is now, it isn't worth getting. You're better off saving your money for something more worthwhile.. I wanted to like it, but a combination of things made me regret repurchasing it.

1. Needlessly complicated controls
2. WTF did you get rid of town liberation? THAT WAS MY FAVORITE PART OF THE LAST GAME
3. Not enough cutscenes
4. The unlocking of weapons is a stupid idea
5. Tried too many new things. Please add many of JC3's attributes back and I would definitely be back to play it again.. I can't load any saved game without purchasing The Forgotten DLC, why force purchases?. Been playing the game more, up to Stage 27 but can't do it ;X

It's really good game, different than other puzzle games, well worth \$3!

To the developer, I noticed a few things

- 1) Sounds bugged out at the beginning of some levels
- 2) My retries seem to not display after 100ish. "It is said that the journey of a thousand miles begins with one step..." Still a really satisfying and enjoyable game, close to 20 years later. Works perfectly on my PC too.. I was on the fence of buying Tabletop Simulator for a long time. Until today. I bought a four-pack and the Zombicide DLC so I can play the game with my family who live on the other side of the continent. We used to play together a lot over the holidays when I visit.

This DLC was my first time playing Tabletop Simulator, but man, the experience was absolutely fantastic. I love the organization of all the pieces and the high resolution of all the manuals and FAQ booklets are an awesome addition.

They also did a great job with all the minis and it is super easy to set up a board.

I'll definitely be buying the other seasons of Zombicide if/when they come out.. It's a very interesting story with surreal visuals however it's a burden to play.

Death events are similar to Dragon's Lair where if you don't act immediately you have to keep sitting through the same ten to fifteen second death scenes over and over. To make things worse the controls requiring quick reflexes are also convoluted ie; Hold Y, then hold LT, then while still holding both Y and LT hold B to bring up a heat rate gauge which you try and keep centered gently squeezing and releasing on RT

There's no autosave. I accidentally overwrote my save frantically and frustratedly trying to get out of a new game I accidentally started when trying to race through the death scenes I had seen umpteen times.

Also there is a good minute before the game window even comes up when launching and sometimes you'll get a bad launch where you can't interact with the start menu options

The game is an effin mess - like those cartoons where the protagonist is fighting with a folding chair that eventually snaps shut swallowing him.

For the sake of the art and story just save yourself the anguish of fighting with a clunky game that feels and looks like a PS2 title forced through a s****y emulator and watch the walkthrough free on Youtube.. I adore this game and I can hardly explain why; the color, music, and totally minimalist gameplay create an experience can perhaps only be described as 'fun', pure, simple 'fun' untethered by our expectations of a plot or any discernable end goal.

At its current (sale) price you'll more than get your money's worth from simply trying to decode messages.

Confused you? I'm confused myself. All I know is I'm having fun.

so i cant get the sd60 how do you download the sd60 or get it?. no development and no content. enough said.. baby launching simulator

10/10. surprisingly fun - something you can play while you have your lunch. It's very immersive and extremely fun if your team works together, but my biggest issue is the ability for either team to dominate 100%, once you get the correct positions you cannot be taken down due to the teleport mechanic. You just camp at certain key locations like ramps where you can only be shot from one position and then spam that place while your team behind you takes down the core.

It's extremely unpolished for that price, I'd buy it for 5\u20ac but the map design really needs some work.. Game has Potential, but was released with too many issues. Devs aren't really putting updates out there, Its almost like they gave up on the game. all around waste of money and time, Hope they actually do something with this game for it does have great potential with a lot of hard work.. I usually hate rogue-likes. For some reason I 100% love this game. One of the best games ive ever played.

The music is so freaking amazing.

Perfect game for coop.. This must be the Best \$6 game sold for \$15 this year! if you screw up the mechanics story runs out before the game ends?. Great time waster. It is a pretty fun game, the mechanics are simple and it is easy to play, once u play it you wont stop, the only problem is that the game is a little but old and its almost impossible to find online players, but if you got friends and some controllers laying around you can play 1v1v1v1 or 2v2
